New City Phase 2, Wah Cantt,
Islamabad, Pakistan

TECHNICAL SKILLS

- Machine Learning
- Deep Learning
- AI Automation
- ANN / CNN
- Computer Vision
- Deepfake Tech
- Chatbot Development
- Prompt Engineering
- Data Science & EDA
- Feature Engineering

PROGRAMMING

- Python
- SQL
- MongoDB
- MySQL

LIBRARIES & TOOLS

- Pandas, NumPy, Scikit-learn
- TensorFlow, Keras
- OpenCV, Matplotlib, Plotly
- Streamlit, Flask
- Jupyter, Google Colab
- VS Code, Git & GitHub

SOFT SKILLS

- Problem Solving
- Critical Thinking
- Team Collaboration
- Communication
- Time Management
- Adaptability

LANGUAGES

English
Urdu

PROFESSIONAL SUMMARY

Artificial Intelligence undergraduate currently in the 6th semester with hands-on experience gained through multiple AI/ML internships and real-world projects. Skilled in Machine Learning, Deep Learning, AI Automation, Computer Vision, Data Analysis, and database management. Passionate about developing intelligent solutions, automating workflows, and applying AI technologies to solve real-world problems while continuously expanding technical expertise.

MAJOR HIGHLIGHT

Completed 3 AI/ML internships and developed 5+ real-world Artificial Intelligence projects specializing in Machine Learning, Deep Learning, AI Automation, Computer Vision, and Predictive Analytics using modern AI frameworks and tools.

PROFESSIONAL EXPERIENCE

Machine Learning Intern

Decode Labs | 2026 (2 Months)

- Developed and evaluated machine learning models using real-world datasets.
- Performed data cleaning, preprocessing, and exploratory data analysis.
- Implemented AI-based predictive solutions and improved model performance.

Machine Learning Intern

Skillyfy | 2025 (2 Months)

- Built machine learning models using Python and Scikit-learn.
- Applied feature engineering and data preprocessing techniques.
- Worked on practical AI and data analysis tasks.

AI & Machine Learning Intern (Remote)

CoderXa | 2026 (1 Month)

- Developed AI solutions using Python.
- Worked on predictive analytics and AI automation tasks.
- Collaborated remotely on machine learning projects.

PROJECTS

AI Timetable Automation

Developed an AI-powered timetable automation system that generates conflict-free schedules and reduces manual planning.

Technologies: Python, Machine Learning

AI Timetable Generator

Designed an intelligent timetable generator capable of producing optimized schedules based on user-defined constraints.

Technologies: Python, AI Algorithms

Eye-Based Image Analysis System

Built a computer vision application for analyzing eye images to perform intelligent prediction and image analysis.

Technologies: OpenCV, Python, Deep Learning

E-Bike Battery Health Calculator

Developed a predictive model to estimate e-bike battery health and performance using machine learning techniques.

Technologies: Python, Machine Learning

Daily Life Automation

Created AI-powered automation solutions for simplifying repetitive daily tasks and improving productivity.

Technologies: Python, AI Automation

EDUCATION

Bachelor of Science in Artificial Intelligence (BSAI)

COMSATS University Islamabad, Wah Campus | 2023 – 2027 | Currently in 6th Semester

Studying Machine Learning, Deep Learning, Computer Vision, Natural Language Processing, Data Science, Intelligent Systems, Database Management, Software Engineering, and Artificial Intelligence with practical implementation through projects and internships.

CERTIFICATIONS

UnAthena Professional Courses:

- AI Automation
- Machine Learning Algorithms
- Chatbot Creation
- Artificial Intelligence Fundamentals
- Prompt Engineering

KEY ACHIEVEMENTS

- Completed 3 Artificial Intelligence & Machine Learning Internships.
- Developed 5+ AI and Machine Learning Projects.
- Built AI Automation and Computer Vision applications.
- Hands-on experience with Machine Learning and Deep Learning frameworks.
- Practical knowledge of data preprocessing, predictive modeling, and AI deployment.
